

AYUSH HARSHIT

Final Year | B.Tech, Computer Science & Engineering

Siddhartha Institute of Science and Technology

+91 91538 13123 | ayush.harshit2005@gmail.com | linkedin.com/in/ayush-harshit | github.com/Ayushharshit1

AREA OF INTEREST

Full-Stack Development · Cybersecurity · Threat Intelligence · AI / Machine Learning · Software Development

EDUCATION

Qualification	Board / University	Year	CGPA / %
B.Tech, Computer Science & Engineering — Siddhartha Institute of Science and Technology	JNTUA (Jawaharlal Nehru Technological University, Anantapur)	2027 (Exp.)	7.3 CGPA
Intermediate (Class XII)	NWAC	2023	81.8%
Matriculation (Class X)	CBSE	2021	61.4%

INTERNSHIP

Secure Elements 2 Months

- Built **ThreatLens** — an enterprise Cyber Threat Intelligence & Attack Surface Management platform — using React, Vite, TypeScript, Tailwind CSS, NestJS, MySQL, and TypeORM.
- Implemented CVE correlation and threat-intelligence pipelines integrating AbuseIPDB, URLhaus, and CIRCL feeds.
- Developed SBOM (Software Bill of Materials) and Binary Analysis modules for firmware and dependency security scanning.
- Integrated a RAG-based LLM pipeline for AI-driven threat summarisation and natural-language PDF querying.
- Managed version control and deployment workflow using Git, GitHub, pnpm, REST APIs, Swagger, and cloud deployment.

Full Stack MERN Internship — SmartBridge Educational Services Pvt. Ltd. 2 Months

- Built full-stack web applications using the MERN stack (MongoDB, Express.js, React, Node.js) covering front-end UI, REST API design, and database integration.
- Implemented RESTful APIs and connected them to a React front-end for dynamic, responsive user interfaces.
- Practiced end-to-end deployment and version control workflows using Git and GitHub.

Add 1–2 specifics of what you actually built here — I've kept these bullets generic since no project details were provided.

PROJECTS

ThreatLens — Threat Intelligence, Vulnerability Correlation & Firmware Security Platform

- Designed an interactive security dashboard with JWT-based authentication, live CVE feeds, AI-assisted threat summaries, and one-click SBOM export (CycloneDX).

SKILLS

Frontend	React, Vite, TypeScript, Tailwind CSS, React Router, TanStack Query/Table, Axios, React Hook Form, Zod, React Flow
Backend	NestJS, Node.js, Express, JWT, bcrypt.js, Multer
Database	MySQL, TypeORM
Cybersecurity	CVE Correlation, Threat Intelligence, AbuseIPDB, URLhaus, CIRCL, SBOM, Binary Analysis
AI/ML	RAG (Retrieval-Augmented Generation), LLM Integration
DevOps	Git, GitHub, pnpm, Cron Jobs, REST APIs, Swagger

CERTIFICATIONS

- Quantum Computing Bootcamp
- NPTEL — Introduction to Industry 4.0 and Industrial Internet of Things
